1022 Scogin Drive
Monticello, AR 71655

Lori Cingolani, Science Specialist K-12

Science Job-Alike Consortium

Instructional Facilitating—Math/Literacy/Science

The Arkansas Department of Education will provide professional learning to assist Instructional Facilitators in maximizing the effectiveness of their work. Research continues to support the positive impact the instructional facilitator has on student achievement.

Science Job-Alike—

New teachers, new science teachers, or teachers who need curriculum support in science. Meet and work with science teachers ranging from Kindergarten to 12th grade. All Sciences are welcome!

Learn from others, gain new resources and test ideas through hands on experiences.

Science Consortium 2010-2011

2010-2011 Consortium Focus is:

"Notebooking our way to Success"

Science as well as other curriculums are full of opportunities to practice proven instructional strategies such as notebooking and foldables.

Through science we can improve a student's love for reading, help them become better writers, and make math calculations practical.
